ABOUT ME

Scientist/Engineer interested in the perceived quality of real-time visual experiences. More specifically, I work on understanding, quantifying and maximizing perceptual realism, accurate reproduction, and quality (with constituents such as spatial quality, dynamic range, depth, motion and color) for real-time image/video capture (computational photography), synthesis (rendering/graphics) and display (computational display).

The long term goals I aim to push towards are:

- A comprehensive understanding of how the human visual system understands visual realism and aesthetic quality.

- Real-time immersive displays (VR/AR) that are perceptually indistinguishable from the real-world.

- Real-time smartphone camera experiences as good as high-end DSLR cameras.

EXPERIENCE

CAMERA ALGORITHMS SCIENTIST
2024 -
Apple
Cambridge, UK
Research and Development of real-time computational photography/videography algorithms to maximize visual quality for capture and display.

RESEARCH SCIENTIST INTERN - VISION SCIENCE AND DISPLAY ALGORITHMS
10/2022 - 6/2023
Meta ∞
Sunnyvale, California, USA
Mentors: Alex Chapiro*, Ajit Ninan, Nathan Matsuda, Douglas Lanman
Worked with the Applied Perception Science and Display Systems Research teams on perceptually optimized computational display algorithms for real-time VR. Designed an ultra-fast automatic/adaptive tone mapper (that optimally maintains perceptual appearance of HDR content after mapping) for standalone VR displays.

DOCTORAL RESEARCHER - VISION SCIENCE AND AR/VR GRAPHICS
2020 - 2024
Perception, Display and Fabrication Group - USI
Lugano, Switzerland

Mentor: Piotr Didyk

Under the mentorship of Piotr Didyk, I worked towards realizing the dream of real-time AR/VR that is perceptually indistinguishable from the visual world. After carefully understanding and investigating the many intricacies of human vision, I designed real-time rendering algorithms to preserve the perception of spatial realism, dynamic range, motion, and depth/distance in AR/VR.

GRADUATE RESEARCHER - IMAGE/VIDEO QUALITY AND ENHANCEMENT
Video and Image Computing Lab - KAIST
Mentor: Munchurl Kim

2017 - 2019
Daejeon, South Korea

Worked on teaching neural networks to perceive image/video quality the same way humans do, with a specific focus on maximizing perceptual quality for Video Restoration/Enhancement.

UNDERGRADUATE RESEARCHER
Neuro-informatics Research Group - NUST SEECS
Mentor: Awais Kamboh

2016 - 2017
Islamabad, Pakistan

Designed real-time unsupervised signal processing algorithms, and their corresponding digital architectures (using VHDL and FPGAs) for future implantable neural chips (primarily for neuro-prosthetics)
